Project and Portfolio Management for Maturing Organizations

Today's organizations are overwhelmed with too much demand and not enough resources to achieve both strategic and operational objectives.

Innotas is a cloud-based project portfolio management (PPM) solution that solves this challenge by delivering a proven approach to managing projects and resources, improving governance and visibility for decision making.

On-ramp Solution for Organizations Starting out in PPM

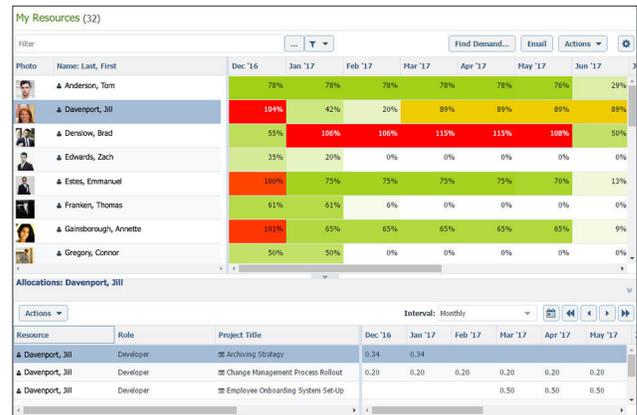

Innotas gives you the ability to align the project portfolio to achieve company goals, while enabling reprioritization and agility for planning resource capacity. From top-down portfolio planning to project and resource management the solution provides:

- **Demand Management and Resource Capacity Planning:** Collect a variety requests in one place and evaluate and make tradeoff decision based on available resources
- **Portfolio Prioritization:** Strategically select the right projects that bring the most value to the business
- **Dashboards and Reports:** Measure, manage, track, and report on all work
- **Resource Management:** Ensure resources are working on the most important projects
- **Project Planning and Management:** Manage project schedules, tasks, and resources to deliver on-time and on-budget
- **Collaborative Workspaces:** Provide a collaborative work management experience that brings teams together to get work done

Be Confident that Resources are Working on the Right Projects

Resource management capabilities in Innotas help to ensure people are working on the highest value, most well-aligned work. Improve on-time project delivery, execution, and view resources in real-time to analyze utilization.

- **Request management:** Collect project work requests and incoming demand for new project initiatives and evaluate what work to take on
- **Demand and capacity planning:** Effectively plan for future work with forecasting, what-if analysis, and role-based planning
- **Time tracking:** Track actual hours on projects to improve expense management, capitalization, and resource utilization
- **Dashboards and reports:** Measure, manage, and track work effort for proactive decision making with real-time access to dashboards and reports

Visualize resource constraints and make tradeoffs in real time for better resourcing decisions

Prioritize Your Project Portfolio with Top-down Planning

Take a top down approach to ensure the organization is focused on the right things, at the right time. Create a systematic approach to strategically align projects to meet business goals. Identify projects that do not warrant investment by understanding projects at every level, from objectives to cost. Prioritize the highest-value projects and determine what can realistically be completed based on resource capacity and budgets.

- **Top-down portfolio planning:** Organize projects in any number of portfolios for all key stakeholders – create as many portfolios as required to drive business alignment
- **Scoring:** Gather scores from across the organization throughout the project lifecycle for prioritization of the highest value work and requests
- **Use Predictive Portfolio Analysis** to identify the optimal mix of projects: Predict, plan, and re-plan your optimal portfolio of projects and resources. Optimize alignment to business goals, increase agility, and save time and money

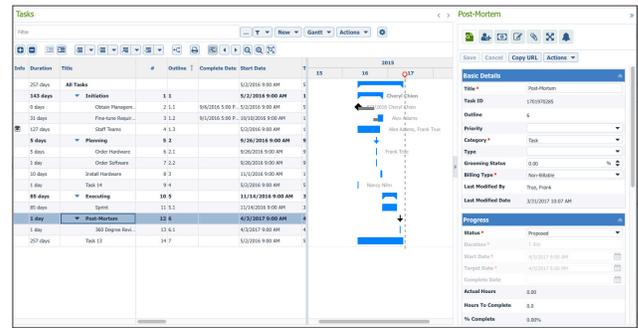

Plan and communicate with stakeholders to meet strategic goals

Plan Projects and Deliver On Time, On Budget

Improve planning and project execution across your entire project portfolio with visibility into the plan, tasks, financials, and more.

- **Project management:** Manage project schedules, tasks, and resources in a single location with access to configurable reports and KPIs
- **Agile:** Achieve greater visibility and project delivery when using Innotas and JIRA together. Improve communication between project managers and developers, maximize productivity, and project delivery
- **Project financials:** Stay on budget for every project in your portfolio with expense tracking and reporting

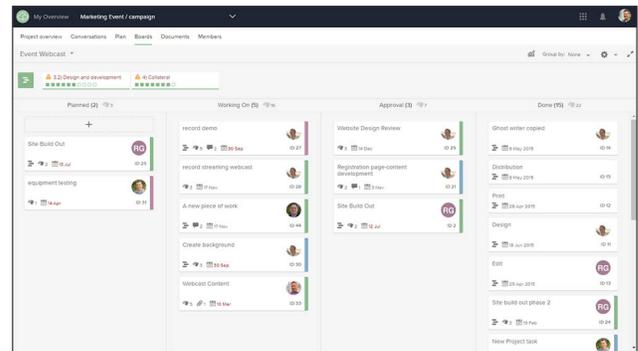

Focus on highest impact work and align your resources and projects with organizational goals

Empower every team member with collaborative workspaces to get work done

Much of the everyday work done by team members occurs “below the line” of formal project management – activities that are often unstructured, ad hoc, and cross-functional. Team Member Plus provides each team member an Innotas timesheet combined with a collaborative work management experience to improve productivity and adoption.

- **Kanban boards and cards:** Teams come together to plan work, execute tasks, and collaborate on Kanban boards, documents and conversations
- **My Overview:** Each team member has a home page with a single view of all their assignments across workspaces, including personal to-dos
- **Mobile:** Every team member can access their collaborative workspaces via an intuitive mobile application that provides team members an ideal way to always stay in touch with their team and the work at hand

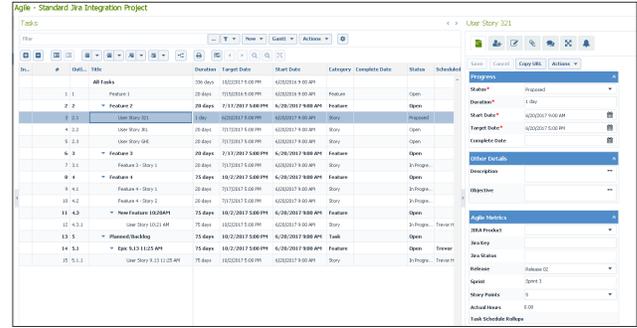

Get an overview of all team work and tasks

Integrate Core Applications with Innotas

Planview's Integration as a Service makes it easy to integrate your core business applications with Innotas. Get a comprehensive view of your data across all systems for better decision making by leveraging Planview's expert resources and secure cloud technology.

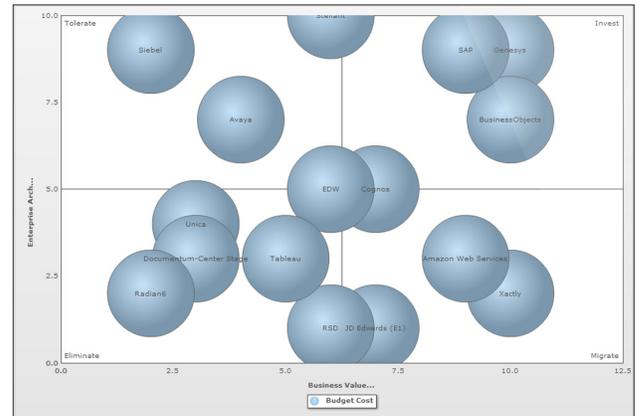

- **Visibility and transparency:** Integrate with agile development, project management, service desk, human resources, and financial systems including Atlassian JIRA, Microsoft Project, Service Now, SAP and more
- **Simple, flexible, reliable:** Planview maintains, manages, and implements the integration, and enables seamless connectivity with any cloud or on premises business application

Get the data you need from your organization's systems and applications

Rationalize Your Applications and Assets

Use Innotas to analyze your application inventory and facilitate decisions to rationalize, eliminate or continue investments in technology assets that support business priorities.

Better manage and rationalize your application portfolio
