

PRODUCT BRIEF

PLANVIEW® ADAPTIVEWORK

PPM Built to Scale With Your Organization

One governed platform to plan, deliver, and adapt work across every portfolio as you grow

As organizations scale, execution spreads across disconnected tools, governance depends on manual effort, and resource planning lives in spreadsheets. Leaders lose a single, reliable view of financial and delivery performance, and struggle to know whether work is on track.

Planview AdaptiveWork consolidates execution into one governed platform that adapts to how your organization works. Built for maturing to advanced PMOs and transformation offices that have moved beyond foundational PPM, it supports IT PPM, professional services, product development, and R&D, with Planview Anvi® embedded throughout and grounded in your live portfolio data.

Deliver Predictably

Keep projects moving with consistent governance across waterfall, agile, stage-gate, and hybrid teams.

See the Whole Portfolio

Understand delivery, financials, and resources in one place so leaders can make informed decisions quickly.

Make Confident Decisions

Weigh trade-offs and surface risk early so you prioritize the right work.

"Cargill has become more agile and adaptive thanks to Planview, and it has allowed us to gain the foresight and visibility we need to move faster and with greater confidence, knowing that resources are focused on the right initiatives."

– **Michelle Misko, PPM Center of Excellence Leader, Cargill**

Key Benefits

✓ See the Full Picture

Give teams, PMOs, and executives the view they each need, from individual projects up to the full portfolio, all from live data.

✓ Adapt as Your Organization Grows

Support new teams, evolving processes, and changing priorities without replacing your platform.

✓ Consolidate Fragmented Tools

Replace scattered work-management tools with one governed platform across teams.

✓ Improve Productivity

Automate repetitive tasks, approvals, and reporting so teams spend less time managing work and more time delivering.

✓ Plan Resources with Confidence

Balance people, contractors, and budgets before bottlenecks affect delivery, so teams stay focused on the work that matters most.

✓ Give Every Project Manager Better Insight

Help teams spot risks sooner, answer questions faster, and make better day-to-day decisions with AI built into their workflow.

Why Choose Planview?

Planview® AdaptiveWork gives PMOs the flexibility to support different ways of working without sacrificing the governance and visibility needed to scale. Teams can get up and running quickly, then expand their use as needs evolve, while connecting AdaptiveWork with the financial, HR, development, and reporting systems they already rely on.

Planview AdaptiveWork is named a Leader in the 2026 Gartner® Magic Quadrant™ for Adaptive Project Management and Reporting for the fifth consecutive year, recognized for its market understanding, industry configurability, and stable global operations.

DE BEERS GROUP

AI Built For PPM

Planview Anvi® is purpose-built AI for project and portfolio management, not a generic model. Grounded in 30+ years of PPM expertise and your live portfolio data, Anvi works alongside your teams to surface risks, answer portfolio questions, and speed decisions, so every project manager works with the same quality of insight.

How We Do It

✓ Flexible Delivery Models

Support waterfall, agile, stage-gate, and hybrid work in one platform while maintaining consistent governance across teams.

✓ Financial, Portfolio, and Resource Visibility

Connect project, financial, capacity, and portfolio data in one model, so anyone gets a 360-degree view and can monitor performance from a single project to the enterprise portfolios.

✓ Demand Management and Prioritization

Capture intake, score and rank requests, and standardize prioritization with configurable forms and workflows.

✓ Time-Phased Planning

Plan financials, resources, and capacity across the periods that matter, so you see not just totals but when spend and demand land.

✓ Configurable Workflow Automation

Automate approvals, status updates, and handoffs with low-code workflows that adapt to how you work.

✓ AI Built Into Everyday Work with Anvi

Answer questions, flag risks, and surface insights from live portfolio data, so your team makes the call with the right information.

The Planview Value

Planview AdaptiveWork helps organizations move beyond fragmented tools and spreadsheets by combining governed flexibility, bidirectional reporting, capacity planning, and embedded AI in one platform. PMOs gain visibility and governance to scale execution and deliver predictably.
