

The SPM Solution Other Vendors Can't Match

Experience the difference with a solution that actually delivers its promises

More than 3,000 organizations choose Planview over other SPM vendors because Planview delivers what others can't.

Unrestricted Scalability

Support your enterprise through rapid periods of growth, acquisitions, and market expansion without missing a beat.

While other SPM solutions lag and break down under enterprise complexity, Planview supports **unlimited users, portfolio, and data volume** without costly migrations.

Seamless Integrations

Integrate your existing technology ecosystem without workflow disruptions or data migrations. Your teams already have the systems and processes that work best for them. Other platforms expect companies to start from scratch using their preferred tools, but not Planview.

Planview has an extensive API library and pre-built connectors with over 200 enterprise tools, from Jira and Azure DevOps to SAP and Salesforce. Teams continue using their preferred tools while leadership gains visibility across all work streams, using Planview's SPM solution as the single source of truth.

Total Flexibility to Support Your Enterprise

Adapt SPM to your strategy, not the other way around.

While rigid SPM platforms force you into their preferred frameworks and require costly organization change management, Planview works with your existing processes.

Support waterfall, Agile, and hybrid methodologies simultaneously. Different business units decide how to operate based on what works best for them, while maintaining unified strategic reporting across your organization.

Make Planview Copilot Your AI-Powered Strategic Advantage

Bring AI directly into your strategic decision-making process with Planview Copilot.

Receive immediate, actionable insights to your biggest questions while easily navigating complexity. Never miss critical patterns or opportunities hidden in your portfolio data.

Ask Planview Copilot natural language questions like:

- Which initiatives are at risk of missing budget targets?
- What's the impact if we reallocate resources from Project A to the new market expansion initiative?

Copilot instantly analyzes your entire portfolio landscape and delivers actionable insights. Model scenarios, get strategic recommendations, and make informed, confident decisions in minutes – not days.

Planview's SPM Solution Is Built for Flexibility

| | Planview | Broadcom Clarity | Planisware | Wave by McKinsey |
|--|--|---------------------|------------|---------------------|
| Integrations Seamlessly maximize connectivity, visibility, and productivity across your enterprise. | Leverage 60+ pre-built, no-code integrations with popular DevOps, Agile, and collaboration tools like Jira Software, Azure DevOps, Digital ai, and more. | X | X | X |
