

# Organizations Continue to Struggle with Making Collaboration Work

Global study of 650 professionals involved in some form of project management report continued problems with project collaboration, resulting in negative business impacts. Modern teams want modern tools to get work done no matter how they work.

## 5 Key Findings from a Global Survey

The results show that it's becoming increasingly challenging to effectively manage a team:

**1 Everyone is a project manager**  
2 out of 3 professionals are not project management certified **but are expected to manage projects.**

**2 Teams are ever more varied and virtual**  
80% now collaborate across functions and 59% are geographically dispersed, making it **more difficult to communicate.**

**2**

**3 The Project Management Office (PMO) has a stake in the game**  
72% of projects are governed by a PMO, **creating both challenges and opportunities** for those who manage projects.

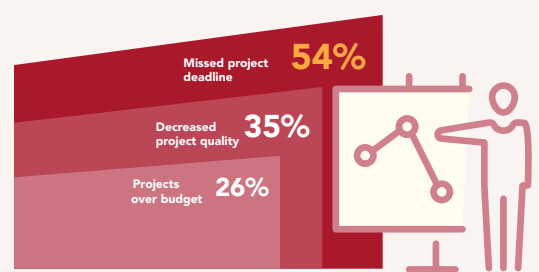

**4 Too many disparate tools are hurting team productivity**

Teams now use an average of 5.6 approaches to support project collaboration, with 4 traditional tools at the top: email, audio conferencing, web conferencing, and spreadsheets. **One-quarter say no one uses the same tools.**

**4**

**5 Businesses are suffering the consequences**  
Collaboration inefficiencies waste time (more than half) and result in **missed project deadlines (54%)**, among others.
