

Your AI for Connected Work

Connect Strategy to Delivery with Enterprise AI

Despite organizations racing to implement AI tools that make teams faster, most still struggle with a foundational challenge: only 27% of work actually aligns to strategic objectives. While teams are indeed moving faster with AI, they're operating in disconnected, uncoordinated ways that amplify existing misalignment and pull resources further from strategic priorities.

Planview Anvi™ delivers AI specifically designed for this connected work challenge. With deep domain expertise, proven methodologies, and a contextual understanding of your organizational data, Anvi helps teams prioritize product and project initiatives, drive coordinated results, and optimize operations across interdependent work. This ensures AI investments drive both strategic alignment and productivity gains across your organization.

Expert Guidance for Your Role

Easy to Use Across Your Organization

Powerful Workflow Automation

"This approach ensures that Gen AI becomes a natural extension of our project management practices rather than a separate tool."

– Estela Lauricella-Thota, Senior Director of Technology Transformation at Cognizant

Key Benefits

✓ Get Expert Guidance On-Demand

Access deep connected work expertise instantly through AI that understands portfolio, project, resource, product, and engineering management best practices, proven methodologies, and your organizational data.

✓ Identify Risks and Opportunities Early

Surface hidden risks, bottlenecks, and strategic opportunities across your organization through AI-powered analysis that leverages Planview's data fabric for contextual understanding of work patterns, dependencies, and more.

✓ Save Time On-Demand and Through Automation

Ask Anvi for immediate insights and reports through natural conversation, or deploy agents that automate tasks like executive summaries and risk monitoring. Start with pre-built agents for quick wins or customize your own for advanced workflows.

✓ Make AI Easy to Adopt

Get up and running fast with minimal learning required – whether leveraging contextual AI embedded in your applications, chatting naturally with Anvi, or launching quickly with ready-made agents and suggested prompts.

✓ Deploy Powerful Custom Automation

Create sophisticated agents that handle complex, multi-step processes tailored to your organization's unique needs – from automated portfolio analysis to cross-team coordination workflows that execute on your schedule with your business rules.

Why Choose Planview?

Unlike general-purpose AI tools that deliver generic recommendations and siloed insights, Planview Anvi™ connects strategic initiatives to execution outcomes through deep domain expertise, contextual understanding of organizational data, and intelligent coordination that helps organizations bridge the gap between strategy and delivery.

Key Capabilities

✓ In-App Intelligence

Leverage AI that's seamlessly embedded within your existing workflows and applications – delivering contextual insights, risk detection, sentiment analysis, and intelligent assistance exactly when and where you need them..

✓ Conversational Chat

Get on-demand access to expert guidance, strategic recommendations, and intelligent actions across your work ecosystem through intuitive natural language conversation that understands your role, context, and organizational data.

✓ Custom Agents

Build and deploy intelligent agents tailored to your specific workflows – from pre-built templates for quick wins to sophisticated custom automation that handles routine tasks, complex analysis, and cross-team coordination on your schedule.

✓ Planview Data Fabric

Anvi leverages Planview's comprehensive data fabric with 60+ connectors to provide contextual understanding of work patterns, dependencies, and relationships across your entire organizational ecosystem, powering trustworthy AI insights at enterprise scale.

✓ Privacy, Security, and Trust

Enterprise-grade data protection with SOC 2, ISO certifications, and regional data residency ensures your information remains secure. Planview never uses customer data to train generative AI models.

Planview Anvi™ provides your organization with a powerful source of expertise and guidance that helps connect strategy to delivery. Bridging strategy and execution is mission-critical and Planview Anvi™ is the intelligent partner that ensures you are delivering on connected work.
