

Drive Your Agile Transformation

The diagram consists of three red rectangular boxes arranged horizontally, connected by a light gray line. Each box contains a white icon and a text label. The first box on the left features a shopping cart icon with a dollar sign and a rocket, with the text 'Deliver Value Faster and More Predictably'. The middle box features an icon of three people with a bar chart above them, with the text 'Do More With the Teams You Have'. The third box on the right features a balance scale icon with a checkmark and an 'X', with the text 'Confidently Invest in the Right Priorities'.

– *Steve Marjot, Head of Change Centre of Excellence, NatWest*

✓ Align on What Matters

✔ Prioritize the Right Things

✓ Plan and Fund Change

Connect & Empower Teams

 Improve with Actionable Insights

✓ Optimize & Manage Work

Understand work progress, health, and impact from strategy to delivery and from the portfolio to the teams.

Why Choose Planview?

Planview's Enterprise Agile Planning solution enables your organization to drive transformation your way.

How We Do It

✓ Embedded Objectives & Key Results

Foster and outcome-based approach to strategy and delivery by establishing clear line of sight into shared objectives and key results in the context of work. Architect, monitor and manage objectives and key results to realize business outcomes at every level.

✓ Connected Visibility

Get holistic visibility into all ideas, plans, delivery progress, work and outcomes. From projects to products, across departments and lines of business or value streams and regardless of delivery methodology (Agile, hybrid, waterfall), work type or workflow.

✓ Visual & Collaborative Prioritization

Visually and relatively rank priorities on the criteria that matter most to you and your teams. Compare priorities by creating custom evaluation values coupled with your delivery confidence, to provide transparency into what is approved, not approved or needs further research.

✓ End-to-End Lean-Agile Metrics

Create a common set of real-time, accurate metrics across your entire delivery engine. Understand team performance, funding decisions, financial impact and more to promote continuous improvement, organizational productivity, and rapid decision-making.

✓ Cross-team Collaboration & Delivery

Connect disparate teams to visualize, plan and deliver together. Use built-in collaboration capabilities like virtual whiteboarding and brainstorming canvases, connected Kanban boards, WiP limit and dependency visualizations to keep teams aware and efficient.

✓ Planning & Funding Scenarios

Build agility by enabling your organization to plan and replan with confidence. Visualize and compare investment scenario impacts across priorities, use that information to model trade-offs and create an optimal plan.

Planview's Enterprise Agile Planning solution provides a scalable enterprise-level Lean Portfolio Management, Agile Program Management and Agile delivery platform that supports organizations from strategy to delivery, no matter where they are on their transformation journey. Improve time to market, do more with the teams you have and confidently invest in the right priorities to deliver the value that matters most to you and your customers.
