*ENTERPRISE AGILE PLANNING*

Drive Your Agile Transformation

Planview's Enterprise Agile Planning solution infuses cutting-edge artificial intelligence to enable organizations to scale Agile and drive Agile transformation by evolving the way products and services get to market, increasing team productivity, and confidently funding the outcomes that matter most to the business.

Deliver Value Faster and More Predictably	Do More With the Teams You Have	Confidently Invest in the Right Priorities

"Planview® enables NatWest to maintain transparency of delivery across our Agile teams. At the same time, we are able to track the main-level financial data, outcomes, and business cases, and ultimately the delivery of value throughout our business."

– Steve Marjot, Head of Change Centre of Excellence, NatWest

Key Benefits

✓ Align on What Matters
Share, visualize, and align your organization to the outcomes that matter most.

✓ Plan and Fund Change
Build the most optimal plan by leveraging planning and funding strategies that embrace change.

✓ Improve with Actionable Insights
Drive improvements across the board with AI that provides actionable insights in real-time, refining decisions about people, time, and financials.

✓ Prioritize the Right Things
Prioritize and build the right things by focusing on the highest priorities and desired outcomes.

✓ Connect & Empower Teams
Connect and empower teams to collaborate and deliver their best work regardless of where work gets done.

✓ Optimize & Manage Work
Understand work progress, health, and impact from strategy to delivery and from the portfolio to the teams.

How We Do It

✓ Embedded Objectives & Key Results

Foster and outcome-based approach to strategy and delivery by establishing clear line of sight into shared objectives and key results in the context of work. Architect, monitor and manage objectives and key results to realize business outcomes at every level.

✓ Connected Visibility

Get a holistic view into all ideas, plans, delivery progress, and work outcomes. From varying departments to diverse delivery methodologies, integrate AI to gain deep insights and maintain clear visibility. The generative AI insights can offer a nuanced understanding of all board activities, such as tracking start/end dates, priorities, and work item details, facilitating a cohesive and intelligent oversight across all levels.

✓ Visual & Collaborative Prioritization

Visually and relatively rank priorities on the criteria that matter most to you and your teams. Compare priorities by creating custom evaluation values coupled with your delivery confidence, to provide transparency into what is approved, not approved or needs further research.

✓ End-to-End Lean-Agile Metrics

Create a common set of real-time, accurate metrics across your entire delivery engine. Understand team performance, funding decisions, financial impact and more to promote continuous improvement, organizational productivity, and rapid decision-making.

✓ Cross-team Collaboration & Delivery

Connect disparate teams to visualize, plan and deliver together. Use built-in collaboration capabilities like virtual whiteboarding and brainstorming canvases, connected Kanban boards, WiP limit and dependency visualizations to keep teams aware and efficient.

✓ Planning & Funding Scenarios

Build agility by enabling your organization to plan and replan with confidence. Visualize and compare investment scenario impacts across priorities, use that information to model trade-offs and create an optimal plan.

Planview's Enterprise Agile Planning solution provides a scalable enterprise-level Lean Portfolio Management, Agile Program Management and Agile delivery platform that supports organizations from strategy to delivery, no matter where they are on their transformation journey. Improve time to market, do more with the teams you have and confidently invest in the right priorities to deliver the value that matters most to you and your customers.
