# CREATE END-TO-END CONNECTION WITH PLANVIEW HUB

Even in today's digital-first world, too much human capital is wasted on manual work. It's particularly painful when we're talking about your highest-paid IT talent. Planview® Hub is a sophisticated integration platform that turns your best-of-breed toolchain into a seamless, interoperable pipeline – from idea to outcome.

✓ Improve efficiency   ✓ Increase quality   ✓ Secure your organization's future

More than half of the Fortune 100 use Planview to improve business outcomes

Key Benefits

Restore hours of productivity

Implement intelligent cross-tool integrations to streamline collaboration between teams.

Accelerate development and resolution times

Instantly hand over work, exchange information and provide visibility into progress from any tool.

Make compliance easy

Automate traceability with embedded cross-referenced links from requirements to test.

Reduce rework and avoid delays

Immediately notify all affected parties of changes and updates, regardless of tool.

Customer Satisfaction

Improve efficiency, consistency and communication and eliminate escalations.

Talent Retention

Reduce toil by bringing work to the people, in their tool-of-choice.

Why Choose Planview?

Planview® Hub connects and synchronizes data from all your teams and departments to effortlessly keep everyone involved in software development on the same page. Your teams can use the time they save to reinvest in improving your products and services.

From the minds behind the Amazon bestseller *Project to Product* and the groundbreaking Flow Framework®

A leader in the Forrester Wave™ for Value Stream Management, Q4 2022

"All of development depends on a scalable, integrated, high performance toolchain. Planview is a central hub for a toolchain that allows us to create the most seamless integrations possible."

Rene Te-Strote,
Senior IT Lead
BMW Group

Leverage business-ready integrations

Leverage over a decade of expertise from the world's largest organizations with built-in configurable support for enterprise use cases, edge cases and supplier collaboration.

Rest easy with a scalable, secure architecture

Automate data exchange in near real-time while maintaining the operational stability of your tools thanks to our high performance, low impact connectors.

Connect to your existing ecosystem

Planview is the Value Stream Management partner of IBM, Micro Focus, Jama, and Tricentis. We have over a decade of technical partnerships with 30+ tool vendors including Atlassian, ServiceNow and Microsoft.

Quickly automate cross-tool workflows

Planview Hub is 4x faster to set up and 10x easier to maintain than any other integration solution. Easily integrate multiple tools and tool instances.

Rapidly scale integrations

Reuse and extend configurations to hundreds of projects without additional effort. Replace brittle point-to-point field mapping with robust models and a highly intuitive configuration.

Never fear an upgrade again

We rigorously test our 60+ pre-built connectors every single day against every new tool version to catch and neutralize vendor API changes that could impact your integrations.

Planview Hub Editions

Choose which Planview Hub edition is right for your business.

	PRO Starter package for integrating two Lifecycle tools.	**ENTERPRISE** For organizations interested in connecting part of their software toolchain.	**ULTIMATE** For organizations that want the benefit of a fully integrated software toolchain.
Included Lifecycle Connectors	2	3	Unlimited
Synchronization Flow artifacts like stories and defects between two or more applications and keep them in sync	✓	✓	✓
Enterprise Data Stream Flow artifact activity data to a centralized database in real-time			✓
Gateway Integration Style Create or modify artifacts in lifecycle tools based on event triggers		✓	✓
Planview Universal Connector Develop your own connection to any commercial or in-house repository in your software toolchain			✓
Planview Viz Unlock Package (Add-On)		🔒	✓
