

Planview Universal Connector

Integrate your software toolchain, your way.

Intimidated by the cost, complexity and long development cycles of custom integrations? At Planview we understand the need for software toolchain integration that incorporates industry-standard applications as well as industry-specific or specialized applications, all while eliminating manual work, accelerating handovers, and supporting traceability. Planview's Universal Connector allows you to leverage the proven data models, mapping capabilities, and version testing of Planview Hub to quickly develop your own connector that automates data flow between out-of-the-box solutions and the internal or industry-specific tools that make your software toolchain unique.

**Streamline Software Delivery
with Seamless Toolchain
Integration and Predictability**

**Connect the Product Value
Stream**

**Improve Quality by Reducing
Human Error**

"It works! You make it too easy to connect". – Beta customer

Key Benefits

✓ Make teams more productive.

Automate handovers across industry-standard and industry-specific solutions

✓ Scale with confidence.

Leverage Planview's proven data models, 500K daily tests and over 300 supported versions.

✓ Accelerate delivery.

Build the integrations you need in 4-6 weeks at a lower cost than custom development.

✓ Full developer toolkit.

Includes everything you need to create your own connector including guides, sample code, and premium technical support.

✓ Consistent, reliable, reporting.

Normalize data across your full suite of connected tools using model-based integration

✓ Extend your toolchain

Integrate in-house or industry-specific applications alongside 60+ pre-built connectors.
