

PRODUCT BRIEF

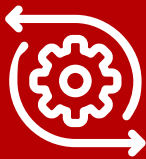

PLANVIEW® PROJECTADVANTAGE

Deliver Projects Faster with Confidence

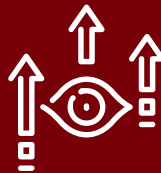

Today's PMOs and delivery teams are expected to manage more projects with limited resources while navigating shifting priorities and increasing complexity. Yet many organizations still rely on disconnected tools, spreadsheets, and manual reporting, making it difficult to see project progress, resource capacity, risks, and costs in real time.

Planview® ProjectAdvantage brings structure and visibility to project portfolio management by centralizing projects, programs, resources, and performance data in one system. With standardized workflows, real-time dashboards, and resource-aware planning, teams can prioritize the right work, coordinate execution across projects, and deliver initiatives on time with greater predictability and control.

Standardize project execution

Establish consistent project planning, governance, and delivery processes to improve execution reliability across teams.

Increase delivery visibility

Gain real-time insight into project progress, resource capacity, risks, and financial performance.

Adapt plans as priorities shift

Update timelines, resources, and budgets quickly as business conditions and priorities evolve.

“Planview ProjectAdvantage helped us manage a complex project with limited resources... increasing our team’s productivity by 15%.”

— **Thierry Jeanselme, Program Director, Orange**

Key Benefits

✔ Improve Project Delivery

Deliver projects faster by connecting project planning, resources, and execution in one unified platform.

✔ Focus Teams on the Right Work

Prioritize initiatives based on strategic value, capacity, and impact to ensure teams focus on the most important work.

✔ Increase Visibility Across Projects

Track progress, risks, and financial performance across projects with real-time dashboards and reporting.

✔ Optimize Resource Utilization

Understand resource availability and capacity to avoid overcommitment and allocate the right people to the right work.

✔ Improve Project Governance

Standardize workflows, approvals, and stage reviews to ensure projects follow consistent delivery processes.

✔ Reduce Administrative Overhead

Automate reporting and streamline project management workflows so teams spend less time on manual updates.

Why Choose Planview ProjectAdvantage?

Planview® ProjectAdvantage enables PMOs to move from fragmented project management processes to structured, scalable project delivery with real-time visibility into execution.

How We Do It

✓ Centralized project portfolio visibility

Gain a unified view of projects, programs, and portfolios to keep execution aligned and transparent.

✓ Financial and cost tracking

Monitor project budgets, costs, and forecasts to maintain financial control across the portfolio.

✓ Structured project planning

Plan and manage projects using configurable templates, Gantt scheduling, AI-assisted project initialization, and standardized workflows.

✓ Governance and stage-gate workflows

Standardize project reviews and approvals to improve oversight and reduce delivery risk.

✓ Resource and capacity management

Align project demand with available resources to ensure teams can realistically deliver approved initiatives.

✓ Real-time dashboards and reporting

Provide accurate, role-based dashboards and reports for faster, data-driven decisions.

The Planview value

Planview provides PMOs with a structured, highly configurable solution to manage project portfolios with greater visibility and control. By connecting project plans, resources, and performance data in one platform, teams can improve delivery predictability, optimize resource utilization, and adapt to change quickly.
