  - Large Solution
  - Value Streams
  - KPIs
- **LARGE SOLUTION**
  - Epics
  - Enablers
  - Value Streams
  - KPIs
- **Core Values:**
  - Lean-Agile Mindset
  - Lean-Agile Leadership
  - SAFe Principles

**Value Stream Funding and Planning:**
- Set direction, fund value streams, and define desired outcomes with Planview Enterprise One strategic and financial planning.

**Program Increment Planning:**
- Decomposing work and capturing dependencies on Planview LeanKit™ Enterprise Kanban boards.

**Program and Team Visibility:**
- Provide enterprise-wide visibility and measure progress by connecting delivery teams in various Agile tools to the program, solution, and portfolio levels.

**Capacity and Scenario Planning:**
- Prepare for PI Planning by modeling value stream and release train capacity against prioritized epics and features with Planview Enterprise One capacity and scenario planning.

**Lean Portfolio Management:**
- Combine a focus on outcomes and Lean approaches to demand management and governance with Planview Enterprise One™ portfolio management.
